NGIT Outlook Anywhere

SHARED VIRTUAL EXCHANGE SERVER HOSTED AND MANAGED BY NGIT - NGIT Outlook Anywhere is a secure managed Exchange server based email environment designed for small businesses. It provides a full Exchange server solution that is designed specifically to be used with the latest version of Microsoft Outlook. Clients can access their email via Microsoft Outlook 2007, Outlook Web Access, Windows Mobile Device, iPhone or a Blackberry handheld. This service is always available, secure, backed up, and accessible from anywhere with a Broadband Internet connection (NGIT do not recommend the use of public computers).

Set-up and implementation of NGIT's Outlook Anywhere service is quick and easy, existing email (within the storage limit), Calendar, Contacts and Tasks can be migrated if required.

NGIT Outlook Anywhere is charged on a monthly basis with no capital expenditure other than initial setup costs, in addition, clients have the option to increase and decrease the number of users month by month.

NGIT Outlook Anywhere provides as standard:

- > 1 GB of Data Storage per user (additional storage available on request for an additional fee)
- > Microsoft Exchange License (one send-from account per user)
- > Anti-Virus and Antispam E-mail Security protection
- > Firewall, Anti-Virus and E-mail Security/Antispam protection
- > 30 days deleted items retention on non "hard deleted" items
- > Sharing of Calendar, Contacts and Emails with other staff members
- > Remote Email Access via the web using Microsoft Outlook Web Access
- > Outlook Mobile Access utilising Active Sync/Microsoft Direct Push to a Windows Mobile PDA / iPhone
- > Blackberry Mobile Access
- > Nightly Backup of Data
- > Support for third party applications such as SAGE and QuickBooks etc
- > Additional Microsoft Application and Server software support available
- > Nightly Data Backup

PLEASE NOTE: This solution features 30 days deleted items retention on non hard deleted items, no email recovery is available beyond this period. Client's purchase an Outlook 2007 Software Licence (if not already in use on their PC) patched to Service Pack 2.
